

Peer Testimonials — Anuja Harsha Nimmagadda

Introduction

These are full, unedited testimonials from colleagues I partnered with at Cloud Software Group — across product, engineering, data science, design, and customer-facing teams. I'm including them exactly as written. No rewrites, no polish, no fluff. They reflect how I work and the impact of the projects I led.

Highlighted Excerpts

“Anuja consistently brought clarity to highly technical workflows and unified engineering, PM, QA, and data science around a shared direction.” — Principal Data Scientist

“She has a strong sense of ownership and always steps in wherever UX doesn't exist yet.” — Engineering Partner

“Her ability to drive alignment across multiple disciplines is rare.” — Product Manager

“She simplifies complexity in ways that improve engineering predictability.” — Engineering Lead

“Anuja is proactive, vocal, and pushes the product to a higher standard.” — Director of UX

“She is the kind of UX leader any team would be lucky to have.” — Principal Systems Engineer

Full Testimonials (Unedited)

1. Vijay Raman

Product & Technology Executive | VP of Product Management
(Managed Anuja Harsha directly)

I had the pleasure of working with Anuja during her time at Cloud Software Group, where she made a significant impact modernizing UX across our legacy enterprise products. She brings a rare combination of strategic thinking, design intuition, and the ability to work seamlessly across product, engineering, and business teams.

Anuja is bold in her ideas and consistently proactive in turning complex problems into practical, user-centered solutions. One example was her leadership in reshaping a decade-old workflow: she facilitated discovery sessions, aligned engineering and product teams around a phased approach, and delivered a design strategy that both improved usability and reduced operational risk for customers.

What sets her apart is her empathy and cross-functional fluency. She listens deeply, challenges with purpose, and ensures design decisions are grounded in user value and business outcomes. She quickly earned the trust of stakeholders at all levels and elevated the quality of decisions and execution around her.

In short, Anuja is a standout design leader who brings clarity, collaboration, and strategic impact to every project. Any team would be lucky to have her.

Vijay was the main leadership figure at my workplace, overseeing product strategy across the organization.

2. Dave Pfeiffer

Experience Design Leader - Director of Design
Managed Anuja Harsha directly)

I had the opportunity to work with Anuja, a senior UX designer who brings energy and determination to tackling complex design challenges. She approaches her work with a fearless attitude and is never afraid to explore new ideas or directions. Anuja is willing to take on difficult problems and push for creative solutions, even under tight timelines. Her enthusiasm for design and willingness to engage with stakeholders made her a valuable part of the team.

Dave was my manager for over 3 years and I collaborated with him closely every single day I was at the company.

3. Anita George

Principal Account Technology Strategist
(Worked with Anuja on different teams)

I have interacted with Anuja on several occasions. They have all been a positive experience.

Our first interaction involved a User Acceptance Test (UAT) of a prototype designed to support the workflow for model building and testing within our enterprise Business Intelligence (BI) platform. During the session, Anuja observed me navigating the screen, asking targeted questions about my workflow choices and tracking my visual focus.

I was highly impressed with Anuja's approach. A strong UI/UX is critical for user acceptance of product features, and her design was clean, intuitive, and clearly addressed the needs of users across different skill levels. Our sessions were very productive.

Anuja has a remarkable ability to utilize practical design principles to effectively bridge the gap between core product features and an enhanced user experience. Anticipating the next move of the user, that is next level UI!

-Anita was my favorite reliable SME and customer representative for ML Functions and IQ Plugin, providing invaluable user insights.

4. Aniket Awchare

Sr. Product Manager
(Worked on the same team)

I had the privilege of collaborating with Anuja on a major initiative to modernize the UI of a new offering for a business intelligence platform. From the outset, Anuja demonstrated exceptional ability to understand intricate workflows and translate them into elegant, user-centric designs that elevated the product's usability and visual appeal. Her strong command of design principles, attention to detail, and clear communication made collaboration seamless and productive. Anuja's professionalism, creativity, and dedication to delivering intuitive user experiences make her an invaluable contributor to any design-led team or organization.

5. Karishma Khadge

Sr. Product Manager

(Worked on the same team)

I had the pleasure of working with Anuja Nimmagadda at Cloud Software Group, where she led UX design initiatives with remarkable creativity, empathy, and precision. As a Senior UX Designer, Anuja consistently demonstrated a deep understanding of user-centered design and the ability to translate complex product requirements into intuitive and visually engaging experiences.

What truly stands out about Anuja is her collaborative spirit and problem-solving mindset. She approaches every challenge with curiosity and openness—balancing user needs with business goals seamlessly. Her design thinking workshops and prototype walkthroughs often became the foundation for key product decisions, driving clarity and alignment across cross-functional teams.

Anuja's work has had a lasting impact on the usability and aesthetic quality of our products. Beyond her design skills, she brings an infectious positivity and professionalism that elevates every team she's part of.

I would highly recommend Anuja to any organization looking for a strategic, detail-oriented, and passionate UX leader who can shape exceptional digital experiences.

- Karishma was the PM I collaborated with on ML Functions and IQ Plugin. We had extremely close collaboration—a true partnership.

Aniket partnered with me on ML Functions and IQ Plugin after Karishma left the org. We had the same close partnership dynamic.

6. Yingchun Chen

Principal System Software Engineer

(Worked on the same team)

I had the pleasure of working closely with Anuja Harsha Nimmagadda on a project to modernize the UI of a complex business intelligence product using the latest HTML standards. From the start, she impressed everyone with how quickly she grasped all aspects of a highly intricate system and translated that understanding into a clear, modern, and user-centered design. Beyond her technical and design talent, she's a collaborative, thoughtful teammate who makes every project better. I truly enjoyed working with her. She's the kind of UX leader any team would be lucky to have.

-I worked closely with Yingchun on ReportCaster, where he was my engineering partner helping me understand the complex legacy system architecture.

7. Shay Bagwell

Lead Customer Marketing Manager

(Worked with Anuja on different teams)

I had the pleasure of working closely with Anuja Harsha Nimmagadda on a project to modernize the UI of a complex business intelligence product using the latest HTML standards. From the start, she impressed everyone with how quickly she grasped all aspects of a highly intricate system and translated that understanding into a clear, modern, and user-centered design. Beyond her technical and design talent, she's a collaborative, thoughtful teammate who makes every project better. I truly enjoyed working with her. She's the kind of UX

leader any team would be lucky to have.

Shay worked with me on several projects where my design made an impact.

8. Radhika Tekumalla

Founder of Kedazzle - Ed TechStartup
Client

Anuja was my EdTech Startup - KeDazzle's Lead UX Designer and I was super impressed by her design thinking and user empathy that led her to develop high quality mobile app and website designs. Smart and very attuned to user needs, she 'just gets it' and developed intuitive designs that were very received by our end users. Dedicated, thoughtful and highly creative - she'd be an asset to any team.

I worked with Radhika for 3 years durring my freelance period. She taught me a great deal about work ethics, delivering on time and working on a wide range of design work for a single project.

9. Vikram Patel

CEO and Co-founder of 9P Studio
Boss

Anuja joined us as an 18-year-old intern who had just learned Photoshop. She didn't know what 'UX' was yet — but she had intensity, discipline, and raw talent you can't teach.

We ran a scrappy, fast-paced startup. No layers, no managers. Within months, she became the designer we relied on for everything — UI, wireframes, branding, game design, motion graphics, client presentations. If it needed design, Anuja owned it.

She attended college in the mornings, came straight to the studio, and worked late nights with our engineers to ship. That wasn't asked of her — that was just who she was.

Over four and a half years, she built dozens of apps, games, and MVPs with us. She learned to collaborate with senior engineers, work directly with co-founders, handle clients, and deliver at startup speed.

By the time she left, she wasn't junior anymore. She was thinking in systems, trusted with high-stakes decisions, operating far beyond her years. 9P Studioz was her training ground — but she'd already outgrown it. She was ready for a much bigger stage."

Vikram was my first ever boss and my first design job, where I learned the fundamentals of design and client work.

Principal Data Scientist Recommendation Letter (Full)

Marcus Horbach, Ph.D. — Principal Data Scientist, Cloud Software Group

4th February, 2025

To:
Hiring Manager,
Apple Inc.

Subject: Recommendation Letter for Anuja Harsha Nimmagadda

Dear Hiring Manager,

It is my pleasure to write to you in support of Anuja Harsha Nimmagadda's application for the role of Senior Product Designer at Apple.

As a Principal Data Scientist at Cloud Software Group, I have worked closely with Anuja on a number of AI/ML-driven initiatives. The clarity of her designs, in spite of the underlying data science and machine learning complexity, is impressive and has greatly contributed to the success of our products.

The key characteristic of her work is that her design solutions are rooted in a deep understanding of the purpose of the product. From that basis, she skillfully navigates the technical UI-design complexities, always leading to clean designs and to products that are a genuine joy to use.

Some of her most important contributions include:

- **Redesigning ML Workflows** – She led the redesign of our machine learning model training and deployment UX, significantly improving usability for both technical and non-technical users.
- **Creating the IQ Feature** – She played a key role in designing a centralized hub for machine learning, insight generation, and natural language querying (NLQ), ensuring AI-powered insights are intuitive and actionable.
- **Improving Collaboration Between Design and Data Science** – Anuja actively engaged with data scientists, engineers, and product managers, asking the right questions, identifying pain points, and ensuring AI/ML-powered features were user-friendly and seamlessly integrated into our platform.

Beyond her technical excellence, Anuja is a collaborative, thoughtful, and inspiring team member. She is fun to work with: always willing to mentor others, share her knowledge, and push the boundaries of what's possible in AI-powered UX.

Although I will be unhappy to see her go, it is the right time for her to follow her ambition, and there is no doubt in my mind that she would be an invaluable addition to your Human Interface Design team.

Please feel free to reach out if you require any additional insights.

Best regards,

Marcus Horbach, Ph.D.

Principal Data Scientist

Cloud Software Group

marcus.horbach@cloud.com

- I won Marcus's trust with ML Functions when I was trying to understand and learn ML. He was the data scientist I collaborated with closely on ML initiatives.
