SENIOR PRODUCT DESIGNER

SUMMARY

Senior Product Designer with **13 years of experience** making complex enterprise products easier to understand, use, and adopt. I solve the design problems most designers avoid - undocumented legacy systems, regulatory constraints, and engineering-first cultures where UX has never had a seat at the table. Modernized a **50-year-old enterprise platform** serving **25M+ users** at FedEx and Walmart, turning fragmented workflows into cohesive systems. My approach is **Engineering Empathy**: I prototype in code, ship design decisions (not just deliverables), and partner closely with engineering to bridge the design-to-development gap.

TECHNICAL AND DESIGN SKILLS

Product Design:	Design Systems Architecture, Figma (Variables, Auto-Layout, Tokens), Adobe Creative Suite, High-Fidelity Prototyping, Product Strategy
Domain Expertise:	Enterprise SaaS, Legacy System Modernization, Data Workflow Design, Fintech (Audit/Compliance), AI/ML Product Design, Logistics
Prototyping and Code:	AI-Assisted Code Prototyping (IDE-based), React, Next.js, Tailwind CSS, HTML5/CSS3, Storybook
Methodologies:	Agile/Scrum, Engineering Empathy and Collaboration, Data-Driven Design, Accessibility (WCAG 2.1 / ISO 9001)
AI-Native Tools:	Cursor, Google Antigravity, Claude Code, AI-Assisted Prototyping, Multi-Agent Workflow Orchestration

DESIGN ENGINEERING PROJECTS (2025)

High-Fidelity AI-Native Prototyping

January 2025 - Present

Portfolio System Architecture and Live WordU Game

- Portfolio System Architecture (Agentic AI - Nov 2025):** Built a production-grade web application from scratch using advanced agentic workflows, implementing complex layouts (bento grids), reusable component systems, and framer-motion animations to demonstrate technical fluency.
- Live WordU Game (AI-Assisted Engineering):** Re-architected the legacy WordU video game (2012) as a modern React/Next.js web app early in 2025, deploying complex game logic and engagement loops to production without a dedicated engineering team.

PROFESSIONAL EXPERIENCE

Senior Product Designer

August 2022 - November 2025

Cloud Software Group (ibi WebFOCUS) - Mission-critical Enterprise Data and Analytics platform serving 25M+ users at global leaders (FedEx, Walmart, Ford, Citi)

- **Led legacy platform modernization for ReportCaster**, an undocumented, 50-year-old enterprise scheduling engine processing **20M+ weekly jobs**. Diagnosed fragmented workflows and partnered with VP of Product to define the UX roadmap and secure executive buy-in for the cloud-native overhaul.
- **Reduced scheduling clicks by 60% and creation time by 50%** by mapping undocumented legacy workflows, consolidating 5 fragmented subsystems into a single cohesive hub, and negotiating a modal-based architecture trade-off with engineering leadership.
- **Achieved 100% SME discoverability (5/5 users) for ML Functions** by replacing a buried 15-click Data Flow process with a streamlined 4-step wizard. Introduced a right-click Predict Data entry point that cut workflow entry from 6 clicks to 2 - now the standard pattern across the suite.
- **Architected the unified Data Science and Machine Learning Hub (IQ Plugin)**, embedding AI at the Core by consolidating 3 isolated workflows (NLQ, Insights, ML) into one entry point, driving a **25% increase in Natural Language Query adoption**.
- **Created the first end-to-end system architecture map** for a 50-year-old codebase, establishing the single source of truth used by 5+ engineering teams to plan dependency migrations.
- **Oversaw design consistency across 3 squads**, mentoring junior designers. Awarded **Monthly Spotlight within 6 months** (first in design team); presented strategy to 200+ person business unit. Contributed to **Dresner Advisory Award-Winning recognition** (2025) and **ISO 9001 certification** through audit-ready UI workflows and WCAG 2.1 standards.

Independent Product Consultant

April 2017 - July 2022

Fractional Head of Product Design - *Acting Head of Design directing end-to-end product execution for B2B and SaaS clients*

- **Directed end-to-end product execution for B2B clients** across Logistics and enterprise SaaS (OneView, Kedazzle), defining MVP feature sets, managing stakeholder handoffs, and ensuring pixel-perfect implementation with remote engineering teams.
- **Shipped production front-end code (HTML/CSS)** alongside design specs for the InfoTriangle Pelli app, reducing engineering handover cycles from 3 rounds to 1 and cutting implementation time by accelerating design-to-code delivery.

UX Designer

December 2016 - March 2017

F1 Studioz - *Global UX Agency - Fintech, Enterprise Logistics, IoT*

- **Architected the Veraction Audit Portal (Fintech)**, consolidating a highly fragmented financial dispute process into a unified Exception Management workspace for auditors, managers, clients, and carriers. Designed complex data visualizations and auditing workbenches tracking multi-currency invoices and risk statuses.
- **Diagnosed scheduling frictions for CRBS (Enterprise Logistics)** by mapping available vs. occupied room states and designing a streamlined booking interface that significantly reduced booking time and steps.
- **Designed the Netgear IoT App**, translating complex device management requirements into an intuitive cross-platform experience (Web, Mobile, Tablet).

Mobile UX Designer

August 2012 - November 2016

9P Studioz - *Fast-paced startup requiring rapid execution and cross-functional collaboration*

- **Shipped 35+ digital products** across iOS and Android in a rapid 4-year agile sprint, establishing foundational expertise in end-to-end product ownership, system governance, and cross-platform design.
- **Achieved 12,000+ organic downloads in week one** for WordU by designing retention-loop mechanics, iterating on session analytics, and collaborating directly with engineers under strict startup constraints.

EDUCATION AND CERTIFICATIONS

MIT xPRO

Professional Certificate in Product Design for AI and Machine Learning

Georgia Institute of Technology

Human-Computer Interaction Certificate

Dr. B.R. Ambedkar Open University

Master of Arts in English | Bachelor of Arts: English and Education

PUBLICATIONS AND COMMUNITY

Community Leadership

- **Active Mentor on ADPList:** Mentoring designers on career growth, portfolio building, and enterprise UX.
- **Design and Leadership Writer:** Active contributor on Medium, sharing insights on design systems and leadership.

Industry Contributions

- **IBI Community Articles:** Authored two technical articles for the Cloud Software Group community on The Secret Behind Better BI and Enhancing UX in WebFOCUS DSML.
